## What's New

### New Email and Phone number

Contact InfoPrint Solutions from UK or South Africa on:

00800 7746 8464  
infoprint@quantumtm.com

### New range of Industrial Serial Matrix printers

InfoPrint's range of Serial Matrix printers has now been refreshed and updated.

- 4247-L03 – entry level, 600cps
- 4247-X03 – mid range, 800 cps
- 4247-Z03 – heavy duty, 1100 cps

*See the 4247 section for more details*

### InfoPrint workgroup and multifunction devices receive BERTL's BEST Awards -

- The InfoPrint 1764 MFP was named Best User Friendly Colour Printer Range
- InfoPrint 1764 was named Best Color Workgroup Printer
- InfoPrint 1769 and InfoPrint 1759 MFP were named Best User Friendly Workgroup Family

*See the MFP section for more details*

### Finance Options

IBM offers smarter financial decisions - customised to your needs

- Competitive rates to help conserve cash and lower TCO
- Customised offerings and contracts for businesses of all sizes
- The flexibility to upgrade or update your technology during the financing term

Simpler experience - one stop financing

- Streamlined contracts and fast turnarounds
- One-stop shopping for financing that covers hardware, software, services and both IBM and non-IBM

For the latest promotions, see:

<http://www.ibm.com/financing/uk/index.html>

### Product Withdrawals

Product	GA date (Date for Withdrawal)	Replacement
InfoPrint 4247-003	June 27 <sup>th</sup>	InfoPrint 4247-X03
InfoPrint 4247-V03	July 25 <sup>th</sup>	InfoPrint 4247-Z03

Office printing represents a huge, untapped opportunity for corporate savings.

## Why buy InfoPrint Printers ?

- **Solutions that help you reduce or eliminate print:** InfoPrint Solutions leads the industry with solutions that help improve productivity, efficiency and quality, while reducing cost. And this is true of solutions we provide in the print and output marketplace. We can help customers migrate from print to electronic document distribution at great savings. Reduce print, or eliminate print. You win either way.
- **Better Integration** with your IT infrastructure to lower your cost of ownership. Our Print Management software enables you to replace many desktop printers with cost-effective Workgroup printers and link into System Management tools such as Tivoli.
- **Broad range** – InfoPrint Solutions has the broadest *business* printer product line of any other vendor...including
  - Laser printer – Workgroup
  - Thermal and Impact – Industrial
  - Cut sheet – high volume departmental or Print on demand
  - Production – Transaction Print
  - Printing Software and Services
- **Low total cost of print** - Our printers are designed to reduce your costs. Many of our workgroup printers feature high yield cartridges, allowing you to print cost-effectively
- **One year on-site warranty included**

## Features guide - Workgroup

### Paper Handling

**Duplex units** - allow printing on both sides of the page, thereby reducing your paper costs. Please note: a 250- or 500-sheet Duplex Unit does not hold 250 or 500 sheets of paper. Instead a "250-Sheet" fits a printer with a base input capacity of 250 sheets (the InfoPrint 1532), while a "500-Sheet" unit fits a printer with a base input of 500 sheets (1552/1572).

**Printer Furniture** – a range of items such as printer stands, shelves to help you manage your printer's environment

### Connectivity

**Serial interface card** - This feature provides a serial interface port for printers that don't have a standard serial interface.

**Parallel 1284-B interface card** - This feature provides an IEEE 1284-B parallel interface port for printers that don't have a standard serial interface. It has a type B parallel connector.

### Datastreams

**Decryption card** - The Decryption option allows an equipped printer to receive and decrypt print jobs that have been encrypted using the decryption software on compatible client operating systems. Decryption supports AES encryption using key and block lengths of 128, 192, and 256 bits, providing robust security for sensitive documents. Decryption also supports the use of Session or dynamic encryption keys, which greatly reduces management overhead. Session keys are automatically and randomly generated with each print job, ensuring that a unique key is applied to each print job.

**Card for IPDS and SCS/TNe** - The Card for IPDS and SCS/TNe provides AFP/IPDS and SCS (LU1) data stream support for IBM servers. The Card for IPDS and SCS/TNe allows customers to print AFP/IPDS or SCS (LU1) documents over TCP/IP to LAN printers.

**Image Quick** - Provides a direct printing solution that enables you to streamline procedures and simplify technical support and management, resulting in improved productivity and reduced document printing costs. This card enables the direct printing of PDF files, TIFF, GIF, JPEG, PNG, BMP, PCX, DCX, HTML files or URLs referencing PDF or HTML files quickly and easily without using a driver.

**Bar Code card** - Enables IPS laser printers to print more than forty seven of the most popular industry-standard bar codes, including Datamatrix, QR Code, Aztec, microPDF417, PLANET, Codablock F, TF14, and HIBC128. The bar code card generates bar codes algorithmically for improved readability.

The Bar Code Card emulates HP printers with an HP BarCodes & More font solution, JetCAPS BarDIMM, or JetCAPS BarSIMM (v.2.0b). The Bar Code Card cannot be used in conjunction with the Card for IPDS and SCS/TNe or the Decryption Card.

## Maintenance and Warranty

**Warranty period:** Twelve months in UK

### Warranty service

- Technical support during warranty period
- IBM Courier Exchange (ICE), 9 x 5 next-business-day

### Warranty service upgrades

- IBM On-site Repair (IOR) 9 x 5 next business day
- IOR 7 x 24 same day

### Post-warranty service

- IBM ICE (courier exchange) 9 x 5, next-business-day
- IBM IOR 9 x 5, Monday through Friday, excluding holidays, next-business-day response
- IBM IOR 24 X 7, same-day

## Supplies

IPS printing supplies have been engineered specifically to complement IPS's line of workgroup printers. Manufactured with stringent quality control standards, IPS printing supplies can help your customers maximize productivity, minimize maintenance and deliver exceptional print quality.

To optimize the performance of your printers use only genuine IPS printing supplies.

- Toner cartridges are engineered specifically to complement IPS's line of workgroup printers
- High yield toner cartridge option (available on select printer models) that increases productivity and provides a lower cost per page
- Return Program toner cartridges available at a significant discount (available on select printer models)

## Features Guide – Industrial printers

### Paper handling

**Input Paper Shelf (#4891, 4991) for 6500** - This shelf is designed to hold a box of paper or forms to be used with a pedestal printer. It allows the input media to move easily with the machine. The shelf rests on the supports for the pedestal printer.

**Pullout Rear Paper Tray (#4540, 4541) for 6500** - An optional Pullout Paper Tray is now available for the cabinet models. This feature provides a convenient tray that pulls out after printed output is stacked on the tray, instead of on the floor. It is easier to remove the printed output from the tray than from the floor inside the printer. The tray is similar to the one used with the Power Stacker feature.

### Connectivity

**Telnet 3270e/5250e** - allows printing currently being performed with coax/twinax attached printers to be migrated easily to network attached printers, without changing the existing application.

**IPDS** - allows print pages containing an unlimited mix of different types of data: high-quality text, images, vector graphics, and bar codes.

**Network Print Server and IPDS LAN Attachment Capability for 4247** - provide the capability for both LAN support and twinax, coax, or serial support on the same IPS 4247 Printer.

**IGP for 6500** - The Intelligent Graphics Processor (IGP) feature is a simple to use programming language for creating sophisticated graphics, including bar codes, in printers equipped with the IGP board. IGP (also sometimes called PGL) creates online forms and bar codes, and has a variety of alphanumeric text-generation capabilities.

**Code V for 6500** - The Code V feature is the QMS(TM)-compatible Intelligent Graphics Processor software designated for the IPS 64XX family of impact line matrix printers. Code V emulates the QMS Code V Version II programming language to produce online forms and bar code, and supports many alphanumeric text-generation capabilities.

**Black Back Forms Sensor (#4640, 4641) for 6500** - This feature provides a forms sensor that is capable of detecting the end-of-forms (EOF) condition for black-backed forms. It may also be used to run forms with binder holes in the body of the form. Because of the variation in the size of binder holes, testing is recommended to verify that the sensor accommodates the size of the binder holes correctly.

**RFID (#4950, 4951) for 6700** - includes a reader, antenna and associated components to enable programming (encoding) and reading of RFID tags. RFID can be installed on the Model R40 or M40 in either the factory or in the field.

Supports Class 1 Generation 2 Tag Types

**On-Line Data Validator (#5610, #5611) for 6700** - an external device that attaches near the paper exit of the printer. It scans the printed output for bar codes and monitors bar code quality. This feature is not applicable to RFID. After a bar code passes the scan beam, the validator grades it and sends a report back to the printer. The printer response is determined by the validator settings. A 1/2-inch distance between bar codes is required when the validator is used. The validator feature only applies to picket fence (vertical) bar codes. The validator cannot be used to verify ladder (horizontal) bar codes.

**Media Cutter and Tray (#7340, #7360, #7380, #7341, #7361, #7381) for 6700** - automatically cuts media after each label is printed or via a software command to cut media after a specified number of labels are printed.

**PXML for 6700** - PXML is an XML-based printer connectivity and control capability that allows third parties to control and monitor print jobs and printer status. Developed with open XML standards, PXML allows RFID and device-management software to interface easily with the InfoPrint 6700.

**Datamax emulation for 6700** - For more information, see InfoPrint 6700 Series Thermal Printer: DGL Programmer's Reference Manual (IBM Form number G550-0508).

## Maintenance

### Warranty Period

Twelve months

### Warranty Service

IBM On-Site Repair (IOR) 9x5 hours, Monday through Friday excluding holidays, next business day response.

Post Warranty Service:

\* IBM On-Site Repair (IOR) 9x5 hours, Monday through Friday excluding holidays, next business day response.

Maintenance Charge: Monthly

## Supplies

**Supplies for 4247** - this customer-replaceable cartridge ribbon supports general-purpose printing as well as automatic identification printing for visible light scanning.

**Supplies for 6700** - A wide range of IPS ribbons that have been specifically engineered to enhance the printing capabilities and to prevent premature printhead wear are available for the InfoPrint 6700 printers.

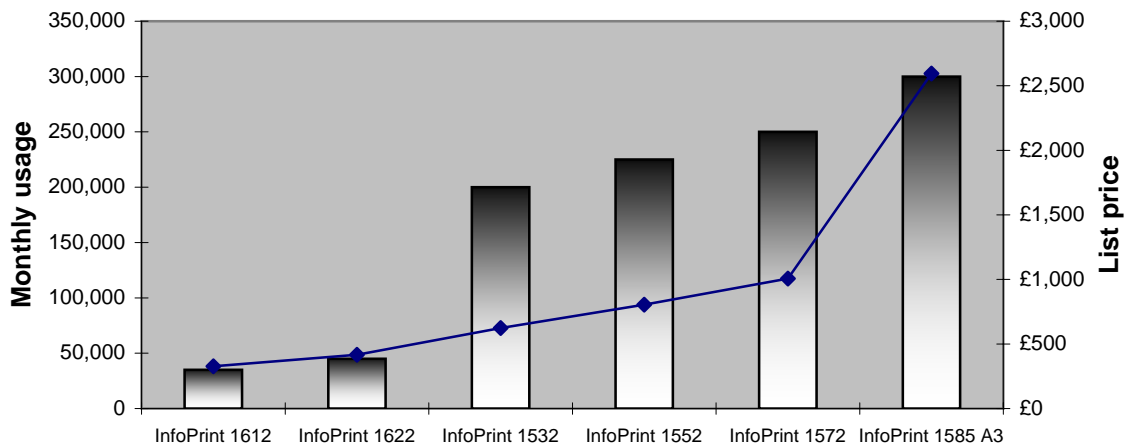

It is recommended that genuine IPS Thermal Ribbons are used with the InfoPrint 6700 printers.

- **InfoPrint 6700 TTW Thermal Transfer Ribbons** - This ribbon provides superior print quality on coated and uncoated thermal transfer paper, labels, and tags. InfoPrint 6700 TTW ribbons are an excellent choice for general-purpose applications.
- **InfoPrint 6700 TTR Thermal Transfer Ribbons** - This ribbon is designed for use with high-end synthetic labels. It provides the highest heat, chemical, and abrasion resistance for label toughness and durability.

Never

## \*Notes

\* InfoPrint Solutions does not recommend printing this monthly maximum on a consistent basis

\*Right sizing guide. Generally speaking the more workload a printer can perform, the lower the Total cost of print. These figures show the approximate print volumes per month at which it would be more cost-effective to invest in the next model up.

# InfoPrint Solutions Monochrome A4 Entry Printers

## InfoPrint 1612: 33 ppm mono A4 laser

Up to 33 ppm A4. Fast, versatile printing, exceptional ease of use and duplex standard for small businesses and small workgroups. Optional wireless connectivity

[More information - http://www.infoprintsolutionscompany.com/internet/wwwsites.nsf/vwwebpublished/1612home\\_uk](http://www.infoprintsolutionscompany.com/internet/wwwsites.nsf/vwwebpublished/1612home_uk)

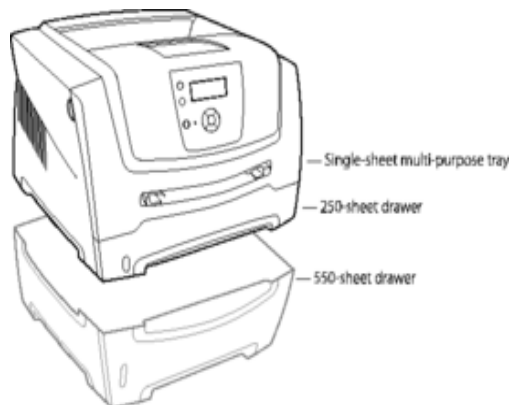

## InfoPrint 1622: 33 ppm mono A4 laser

Up to 33 ppm A4. Speed and reliability, at a low cost of acquisition and ownership. The low-profile InfoPrint 1622 Express, with duplex standard, fits nearly anywhere. Replace older inkjet and laser devices with a new shared laser printer

[More information - http://www.infoprintsolutionscompany.com/internet/wwwsites.nsf/vwwebpublished/1622home\\_uk](http://www.infoprintsolutionscompany.com/internet/wwwsites.nsf/vwwebpublished/1622home_uk)

## InfoPrint Solutions Industrial Printers Model Comparison

Printer	Technology	Principle use	Product Features
<b>InfoPrint 4247-L03 and X03</b> 	Serial matrix	Designed to meet low-to mid-volume output requirements, this printer can provide reliable supply chain and/or office printing at an attractive total cost of ownership	<ul style="list-style-type: none"> <li>* Print up to 800 characters per second</li> <li>* Reduce the need for user intervention with a reliable, heavy-duty design and remote printer management capabilities</li> <li>* Ease integration with optional integrated Ethernet, USB 2.0 and serial, as well as standard parallel attachment</li> <li>* Boost productivity with support for dual paper paths, auto forms loading, auto thickness adjustment, auto eject &amp; restore and more</li> </ul>
<b>InfoPrint 4247-Z03</b> 	Serial matrix	Batch or transaction printing in manufacturing, shipping, retail, wholesale, finance, etc	<ul style="list-style-type: none"> <li>* Print speeds (up to) 1,100 cps</li> <li>* Multilingual 2x24 LCD display</li> <li>* Remote management with virtual operator panel made for demanding print environments</li> <li>* Long life cycle and low per-page cost</li> </ul>
<b>InfoPrint 6500</b> 	Line matrix	Manufacturing, shipping, wholesale, retail, etc.	<ul style="list-style-type: none"> <li>* Print up to 2000 lines per minute (lpm)</li> <li>* Maximize forms access and minimize required floor space with pedestal design, or run more quietly than many laser printers with the enclosed cabinet design.</li> <li>* Offer extreme reliability with a low total cost of printing.</li> </ul>
<b>InfoPrint 6700-M40</b> 	Thermal	Producing RFID2 tags, bar codes and labels in manufacturing, shipping, retail, distribution, wholesale, etc.	Optimize label and bar code printing efficiency and management to meet mid-volume requirements
<b>InfoPrint 6700</b> 	Thermal	Producing RFID2 tags, bar codes and labels in manufacturing, shipping, retail, distribution, wholesale, etc.	<ul style="list-style-type: none"> <li>* Creates RFID smart labels - combine the technology of thermal-transfer, pressure-sensitive labels with electronic RFID tags</li> <li>* RFID ready - simple upgrade</li> <li>* The printer can identify unreliable RFID labels and mark them as faulty as well as send alerts through the network to update the location status of labelled products.</li> </ul>

# InfoPrint Solutions 4247-L03 Entry Serial Matrix Printer

## Highlights

*Simplify supply chain printing with forms flexibility, heavy-duty design and powerful remote printer management capabilities*

*\* Print up to 600 characters per second (cps) on up to 8-part forms on primary and secondary paper paths*

*\* Reduce the need for user intervention with a reliable, heavy-duty design and remote printer management capabilities*

*\* Ease integration with optional integrated Ethernet, USB 2.0 and serial, as well as standard parallel attachment*

*\* Boost productivity with support for dual paper paths, auto forms loading, auto thickness adjustment, auto eject & restore and more*

# InfoPrint Solutions 4247-X03 Mid range Serial Matrix Printer

## Highlights

Reliable high-speed printing for demanding business environments.

- \* Print speeds (up to) 800 cps
- \* Automatic forms loading and thickness adjustment
- \* Supports printing on a wide range of media types.
- \* Remote Printer Management Utility, included with the optional Ethernet controller, gives users visibility to real-time printer status for every printer on the network.
- \* All-points-addressable graphics capability enables quality printing of bar codes, logos, overlays and more.

# InfoPrint Solutions 6500 Line Matrix Printer

## Highlights

Adapt to rapidly changing business environments with the reliable, efficient and easily manageable InfoPrint Solutions InfoPrint 6500. State-of-the-art print engine and controller technology help you keep up with the demands of back office and/or data processing applications. User-friendly controls help minimize user intervention. Powerful remote management capabilities help maximize printer utilization.

- \* Print up to 2000 lines per minute (lpm).
- \* Maximize forms access and minimize required floor space with pedestal design, or run more quietly than many laser printers with the enclosed cabinet design.
- of printer status.
- \* Enhance your supply chain documents with bar codes, graphics, overlays and more.
- \* Maintain optimum print quality with the intelligent ribbon system.
- \* Offer extreme reliability with a low total cost of printing

## Characteristics

Print speed (lpm)	See below
Acoustics	See below
Media	Pinfed continuous forms
Attachments	Parallel, serial, twinax, coax, 10/100BaseT Ethernet, wireless Ethernet
Warranty	One year onsite service, three year extension including standard warranty period available

# InfoPrint Solutions Mid-range 6700 Thermal Label Printer with RFID

## Highlights

Optimize label and bar code printing efficiency and management to meet mid-volume requirements

\* Print speed (up to) 10 inches per second (ips) (254 mm per second)<sup>1</sup> in 4-inch widths at up to 305 dpi resolution

\* Upgradeable to RFID

\* Enables remote printer management and proactive alert notification using InfoPrint Solutions Printer Management Utility and Ethernet option

## Characteristics

Print speed (lpm)	up to 10 ips
Acoustics	less than 66 dBA
Media	Roll or fanfold; labels, tags and tickets; paper, film or synthetic stock; thermal transfer or direct thermal
Attachments	RS-232/USB 2.0/IEEE 1284 (Centronics); USB 2.0: 10/100 BaseT Ethernet (option), Wireless Ethernet (option)
Warranty	One year onsite service, three year extension including standard warranty period available

# InfoPrint Solutions 6700 Thermal Label Printer with RFID option

## Highlights

Optimize label and bar code printing efficiency and management.

\* Print up to 10 inches per second (ips) in 4-, 6- and 8-inch widths at up to 300 dpi resolution

\* RFID support

Management Utility and Ethernet option

\* Support for multiple emulations in base engine

\* Provide choice for thermal transfer or direct thermal printing to meet application requirements.

\* Provide excellent error detection and recovery with IPDS™ support for Twinax and Ethernet

\* Offer an optional bar code validator that scans labels during printing to assure readability

## Characteristics

Print speed (lpm)	10 ips at 203 dpi (203 mm/sec)
Acoustics	63dBA
Media	Continuous form labels, tags and tickets; paper, film or synthetic stock
Attachments	Parallel, serial, twinax, coax, 10/100BaseT Ethernet, wireless Ethernet
Warranty	One year onsite service, three year extension including standard warranty period available

# InfoPrint Solutions Cutsheet printers

## Highlights

- Print up to 90 (InfoPrint Solutions InfoPrint 2190), 110 (InfoPrint 2210) and 135 (InfoPrint 2235) pages per minute (ppm)<sup>1</sup> (letter/A4) with up to 8,050 sheet input capacity and in-line finishing, including a saddle stitch booklet maker
- Advance the security of your information with multiple layers of control
- Simplify walk-up or operator use with a 10.4" (264mm) Super VGA colour touch screen display, multi-function capabilities and versatile editing functions
- Reduce your total cost of print by consolidating current print workloads onto a powerful InfoPrint 2190 or 2210
- Ease integration in many environments with support for multiple data streams, including native InfoPrint Solutions Intelligent Printer Data Stream (IPDS).

# NEW ! InfoPrint Solutions EMP156 Cutsheet printer

## Highlights

- **High speed, High duty cycle** - Feel confident that you can meet high volume production requirements with a monthly duty cycle of up to 4.5 million impressions per month.
- **High speed, high resolution** : print 156 ipm at up to 600 x 600 dpi resolution to produce high-quality text, images and graphics.
- **Printer Consolidation**; Reduce total cost of print by consolidating print workloads onto the high performance InfoPrint EMP156 printer.
- **Ease of use**: Save time with the user-friendly operator control panel on the device and with the Web-based interface that allows you to configure and manage the printer remotely.
- **Versatility**; Simplify your life in complex print environments with the printer's small footprint; adding input and output capacity as needed and multiple datastream support offer a versatile solution for complex print environments.
